

Catalogue of the Chaff Temper sherds that were analyzed with COLORMOD

Each entry illustrates the original scanned image of the sherd section (with corresponding UGR photograph numbers), the same image cropped for analysis, and the last, most fully analyzed version resulting from the COLORMOD application, complete with the respective modal results list. The modal values are expressed as percentages of the total image field.

A16q852p14f190: Bowl; Phase 5
